## Air Support

### Certification / FAA 8130-3 / FAA Export 8130-3:

- Any material that is eligible for an FAA 8130-3 must have one included with the shipment, this applies to any and all products including but not limited to Arkwin Kit components/subcomponents.
- If you have an FAA 8130-3 for a **PMA** part or subcomponent of a **PMA** part but the FAA 8130-3 from the PAH does not state that the **PMA** part is not a critical component, then the Inspector needs to investigate to determine if the statement is applicable or not. If applicable, AAR needs to issue an Export 8130-3 and include the following statement: **This PMA Part is not a Critical Component**
  - If you have a critical component or can't verify criticality, ask your supervisor and/or NCR.
