

## Parts Catalog has been enhanced!

You can now add, update, or delete cost and vendor price break information for individual part numbers.

You can also set future costs for upcoming OEM cost changes.

At this time, only individual PN's can be updated.

### 1 – ADD A NEW COST OR VENDOR PRICE BREAK

Add a new cost and one or multiple vendor price breaks to individual PN's in the Parts Catalog page

⇒ In the view by Part, click on Vendor Price Break

You can then add a new current cost, a new future cost, or a new vendor price break for any cost.

### Reminders!

- ✓ The PN must already be in the IMOPS Part Master to be in the Concourse Parts Catalog
- ✓ The PN must already be in the Concourse Parts Catalog (IMOPS "Agreements") to add a cost
- ✓ The PN must have a cost before a vendor price break can be added

**2 – EDIT AN EXISTING COST OR VENDOR PRICE BREAK**

Edit an existing cost or vendor price break for individual PN's in the Parts Catalog page

- ⇒ In the view by Part, click on Vendor Price Break
- ⇒ Click on EDIT

You can then edit a current or future cost, or a vendor price break. Only certain fields can be edited.

**3 - DELETE AN EXISTING COST OR VENDOR PRICE BREAK**

Delete an existing cost or vendor price break for individual PN's in the Parts Catalog page

- ⇒ In the view by Part, click on Vendor Price Break
- ⇒ Click on EDIT

You can then delete a current or future cost, or a vendor price break.

**Reminder!**

- ✓ Deleting a cost will also delete the vendor price breaks associated with that cost

#### 4 – CURRENT COST VS. FUTURE COST

You can set future costs for upcoming OEM cost changes.

Because a future cost may overlap an existing cost, be sure to review and confirm your dates.

- **Current Cost:** the current cost in Concourse
- **Updated Current Cost:** what the current cost will be, once you click Confirm
- **Future Cost:** what the future cost will be, once you click Confirm

### Confirm New Effective Date Range ✕

The Future Cost and effective date range you entered overlaps the end of the Current Cost effective date range. This will change the effective end date of the Current Cost.

The **Current Cost** and effective range is:

Cost	Effective Start Date	Effective End Date
\$1,000.00	07/19/2023 	12/31/2024 

The **Updated Current Cost** and effective date range will be:

Cost	Effective Start Date	Effective End Date
\$1,000.00	07/19/2023 	12/31/2023 

And the new **Future Cost** and effective date range will be:

Cost	Effective Start Date	Effective End Date
1200.00	01/01/2024 	06/30/2024 

Please Note the new effective end date for your Future Cost as it may have changed

Confirm

#### Reminders!

- ✓ Adding a cost date range that *overlaps* the current cost in Concourse may change the end date of your Future Cost

At this time, only individual PN's can be updated. Stay tuned for the Bulk Upload feature, which will allow multiple costs to be updated at once.
