

Customer Requirements

Revision Date:	3/18/2013	Previous Revision Date:	N/A
Division #:	11	Customer #:	73381
# of Pages:	1	QC Approved By:	Greg Chitman
IHI			

Traceability Requirements:

- All blades and vanes must be provided with the name of the last operator.
- Fan and HPT blades must have T.T. and T.C. documentation.
- Non-incident/accident statement issued by the last operator shall be included with regards to the product on which the subject hardware was installed (i.e. - aircraft/engine).
- All documentation shall not be damaged nor incomplete.
- **LLP's:**
 - Complete trace to manufacturer with birth document.
 - **Engine Data Submittal** from original operator may be considered as birth data.

Certification Requirements:

- All releases (8130, EASA, CAAC, CAAS) for New / Overhauled / Repaired / Inspected conditions must be original.
 - A certified true copy of the original tag may be permitted only for splitting bulk shipments.
 - All return to service tags must have (FAA / EASA) dual release, unless noted otherwise on the PO.
