WORK INSTRUCTION	SUBJECT: Kit Building		

1.0 Purpose:

- 1.1 The purpose of this Work Instruction is to provide guidance to the Commercial Quality Control Inspection team when building kits and when shipping kits on customer orders or inventory transfers.

2.0 Scope:

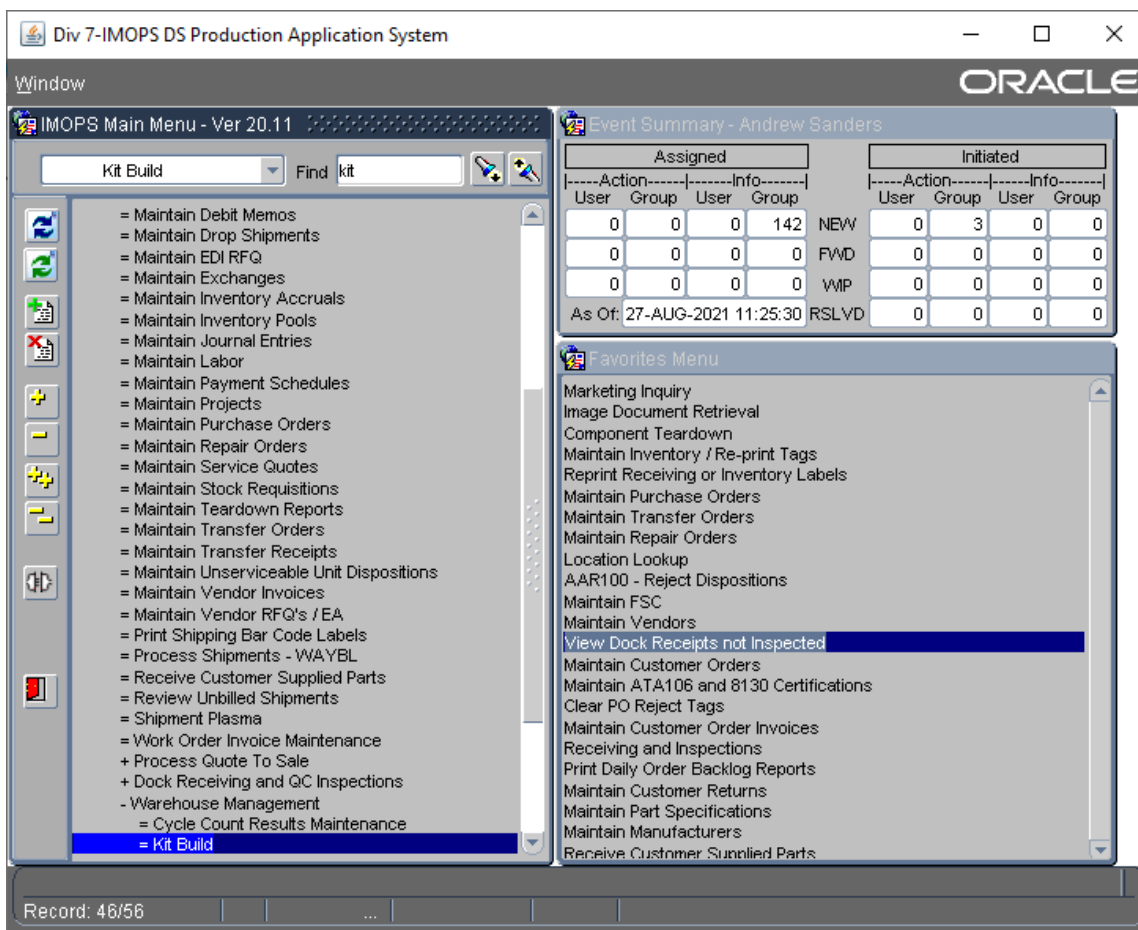

- 2.1 This Work Instruction is applicable for all kits built at AAR Supply Chain, Inc., Wood Dale location.

3.0 Responsibility and Authority:

- 3.1 The responsibility and authority for the administration and implementation of this work instruction has been assigned to the Commercial Quality Manager for AAR Supply Chain, Inc.
- 3.2 Product Line is responsible for creating kits.
- 3.3 Commercial Inspection is responsible for picking and assembling kits.

4.0 Procedure:

- 4.1 Access Kit Build screen in IMOPS.
- 4.1.1 this screen is Division specific so you will need to ensure you are logged into the correct Division before proceeding.

WORK INSTRUCTION	SUBJECT: Kit Building		

4.5 Picking the kit:

4.5.1 Using the above picking list, go to all the warehouse locations listed and retrieve your inventory tags.

a) While filling in the picking information on the top of the form or the right-hand side of the form is optional, the Inspector building the kit(s) shall clearly mark / indicate on each line that it has been both Picked and counted.

b) Make sure to scan your inventory tags / splits to your location when building kits to help prevent NOS's.

4.5.2 If an item is not on the shelf (NOS) that line of the kit will need to be unallocated and reallocated. To unallocate, go to the relevant kit line, right click, action, unsource line:

The screenshot shows the Oracle Kit Build (MW0080) Ver 20.16 interface. The 'Kit Order' section at the top displays details for Order 56390, Kit Part No. F9-A5-KIT-A320NEO, and FSC KIT01. The 'Bill of Materials' table lists various components, with line 9 (S3225-905) highlighted in yellow. A right-click context menu is open over line 9, showing the 'Action' menu with 'Unsource Line' selected. The 'Inventory Selection Criteria' panel on the right includes checkboxes for 'Exclude Non-CSP', 'Exclude CSP', 'All FSCS', 'Use Alts', and 'Use Group Codes'. The bottom status bar indicates 'Record: 9/9'.

4.5.3 To reallocate a new tag / RO / PO or transfer, use the instructions in section 4.2.5 above.

	Date: 07/SEP/2021 Rev: Original	Page: 10 of 13	Number: ASC-WDL-WI-028
WORK INSTRUCTION	SUBJECT: Kit Building		

4.6 Assembling the kit:

4.6.1 Separate the quantity of each tag you need for the kit(s) that you are building. Print a set of paperwork (trace, certs, etc.) and an IMOPS label for each kit line and assemble them into a bin, bin box, cart shelf etc. in a manner that allows you to keep track of where you are in the process and which items have been completed. Check off the items in the kit as you break them out, make your copies and print your labels.

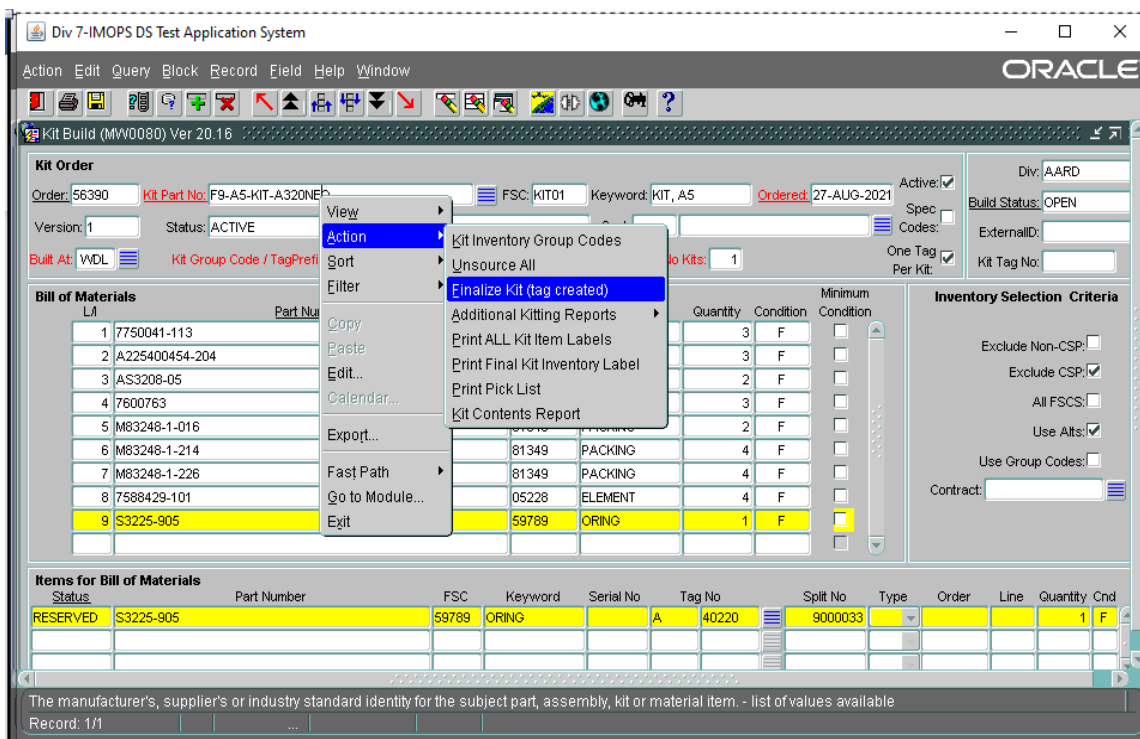

a) While filling in the picking information on the top of the form or the right-hand side of the form is optional, the Inspector building the kit(s) shall clearly mark / indicate on each line that it has been both Picked and counted.

4.6.2 Inspect the product you are building into the kit to include parts, paperwork, quantity, and shelf life. Minimum shelf life to ship without customer approval or concession is 75% remaining.

4.6.3 Upon completion of all splitting, document printing, label printing, and inventory segregation compile all labels and documents into one packet and place it in a document envelope.

4.7 Completing the kit.

4.7.1 Right click, action, finalize kit (tag created):

The screenshot shows the Oracle Div 7-IMOPS DS Test Application System interface. The main window is titled 'Kit Build (MW0080) Ver 20.16'. It features a menu bar (Action, Edit, Query, Block, Record, Field, Help, Window) and a toolbar. The 'Kit Order' section at the top includes fields for Order (56390), Kit Part No. (F9-A5-KIT-A320NE), FSC (KIT01), Keyword (KIT, A5), Ordered date (27-AUG-2021), and Active status (checked). The 'Build Status' is set to 'OPEN'. Below this is the 'Bill of Materials' table, which lists various parts with their quantities and conditions. A right-click context menu is open over the table, showing options like 'View', 'Action', 'Sort', 'Filter', 'Copy', 'Paste', 'Edit...', 'Calendar...', 'Export...', 'Fast Path', 'Go to Module...', and 'Exit'. The 'Action' sub-menu is open, displaying options such as 'Kit Inventory Group Codes', 'Unsource All', 'Finalize Kit (tag created)', 'Additional Kitting Reports', 'Print ALL Kit Item Labels', 'Print Final Kit Inventory Label', 'Print Pick List', and 'Kit Contents Report'. The 'Finalize Kit (tag created)' option is highlighted. The 'Items for Bill of Materials' table at the bottom shows a list of items with columns for Status, Part Number, FSC, Keyword, Serial No, Tag No, Split No, Type, Order, Line, Quantity, and Cnd. The first item is 'RESERVED' with Part Number 'S3225-905', FSC 'S9789', Keyword 'ORING', Serial No 'A', Tag No '40220', Split No '9000033', Type '1', Order '1', and Cnd 'F'.
