Revision Date:	August 14, 2017	Previous Revision Date:	April 12, 2012
Division #:	1, 7, 11	Customer #:	20326, 75, 34661
# of Pages:	1	QC Approved By:	Chris Quinteros
AIR CANADA			

Certification:

- Air Canada will only accept an FAA 8130-3 form from repair stations located in the US. If the repair station is not located in the US or Canada the 8130-3 or EASA Form 1 must have a Transport Canada signoff in block 13.
- Material must be overhauled by an agency on the [Approved Vendors List](#).

Traceability for New Material:

- All New material must be traceable to the OEM.

Traceability for Used Material:

- Unserviceable material must be accompanied by a removal tag or equivalent.

Unapproved vendors:

- Air Canada will not accept any disks handled in any form by American International Airways.
- Air Canada will not accept any material from Peru.

Technical Requirements:

- All ESD units must be in an ESD approved bag and appropriately labeled.
 - For Air Canada this will include metal-encased electrical assemblies / avionics.
 - QC will ensure that the components are capped and bagged prior to being placed in shipping.
