Sumitomo & Sumisho Aero			

Shelf Life Material:

- Sumitomo and Sumisho Aero-Systems Corporation requires at least **60%** of shelf-life remaining at time of AAR Final Inspection.

Material Certification:

- Block 12 must state FACTORY NEW
- One AAR Material Certification per inventory Lot Batch. No grouping.

Packaging Requirements:

- For small parts in bags, parts must be visible in packaging (do not put parts between folded document envelopes).
- All work orders/shippers are to be packaged and shipped separately and not consolidated (do not combine shippers within one box/crate for any reason).
- Expendable hardware must have identification on the packaging.
- Shipment of Hazardous Material goods must be marked/labeled as Hazmat appropriately.
- Any Hazmat material line(s) must be packaged separately and may not be combined with any other shipment.
