**Launching Today!**

## What is Concourse?

To build and bring you a tool that meets the needs of your business, New Growth Engine (NGE) is launching the EDI Exception Tool in stages on a new platform called Concourse. Concourse was built in-house *by AAR, for AAR* and will allow all future technology to be housed in a central location, first on your computer and in the future on your mobile device. You are the one of a select group to experience the EDI Exception Tool that is being designed to:

- Assist you in quoting quicker to your customers
- Achieving greater customer satisfaction
- Easier to assign unresolved RFQ to a customer
- Creating new prospects for greater sales volume

The screenshots show the Concourse EDI Exceptions Tool interface. The top screenshot displays a table of exceptions with columns for ID, Status, Date, Customer Name, Customer Address, Buyer Name, Source, Part Number, PSC, and DIV. The middle screenshot shows a form to assign a customer to an RFQ, with fields for Customer Name, Customer Address, Buyer Name, Source, Part Number, PSC, and DIV. The bottom screenshot shows a form to create a new prospect, with fields for Customer Name, Customer Address, Buyer Name, Source, Part Number, PSC, and DIV.
